

Harri (31)

System administrator for the city of Oulu

Nationality: Finnish

Harri is **single** and lives in a flat in Oulu.

Harri drives Chevrolet Monte Carlo from 1972.
He also owns a Harley Davidson.

His preferred operating system is any Unix-based operating system. He has a Thinkpad laptop and a Xiaomi phone.

“Visualize all the things!”

Motivation

Harri is motivated by keeping everything running, detecting issues before they become problems.

Challenges

Harri is introverted: prefers to work in a calm environment by himself. Harri prefers written communication, because he wants to be able to weigh all the alternatives before making an informed decision.

Appreciates

Harri appreciates philosophical discussions with close friends and wants to relax by spending time by himself.

Fears

Harri doesn't want to be the center of attention and fears having to give presentations to large audiences.

Hobbies

Harri listens to black metal and plays base in a garage band.

He also enjoys tinkering with his Harley Davidson.

APINF considerations

Harri works to keep things stable and secure:

- Prefers to have everything running smoothly
- Dashboard graphs and charts should give him detailed information about usage of their API's
- Needs to be able to cut API usage, if there are malicious attempts or too much traffic
- Sharing API documentation, code examples and integration patterns through Apinf
- Channel for communication between developers (API users) and API administrators
- Preferred languages: Python, Bash

Sources and licensing
